

*Logging contractors, field supervisors and foreman, woodlot owners, government officials and company woodlands staff will all find this workshop of interest and applicable to their day to day activities.*

## **In-Woods Site Disturbance Workshop**

**Tuesday, October 21, 2008**

**8:30 am - 12:00 noon**

Lions Club Community Hall

*(across from Tim Hortons)*

Oxford, NS

As part of a series of technology road shows conducted by FPInnovations-Feric Division, join us for some interesting and practical information on how to minimize soil and site disturbance during forest operations.

The inside program starts at 8:30 am, followed by a field visit to a recent harvest block, finishing up at approximately 12:00 pm. (lunch on your own). Participants will be asked to provide their own transportation to the field site (car pool). Please note: personal protective equipment will be required on site.

► **Workshop objectives:**

- Understand the importance of protecting forest soils
- Become familiar with operating best practices and harvesting equipment configurations that can reduce soil disturbance.

► **The workshop will cover practical topics such as:**

- How can harvesting activities damage forest soils
- Rutting versus compaction, what's the difference
- Best practices to prevent soil disturbance for harvest planning and operations
- Review of operational tools and equipment considerations that can help reduce soil disturbance
